---

**OVERVIEW:**

Installation of Galileo Flight Integrator™ under a Citrix Metaframe platform. Listener not starting.

---

**DESCRIBE ISSUE:**

When Galileo Flight Integrator™ is installed in a Citrix Environment, the shared startup entry for the Galileo Flight Integrator™ component does not auto-start. This is caused by the start-up sequence not being properly configured for all users.

---

**PRODUCT(S) EFFECTED:**

Galileo Desktop

---

**SOLUTION:**

Create a batch file to start the Focalpoint and Galileo Flight Integrator™. Use the following sample as a guide ("M" drive assumes the root drive where Focalpoint is installed).

```
M:  
CD\FP\SWDIR  
  
START FPLOGON.EXE M:\FPMACHINE\GOSTART.INI  
  
M:  
CD"PROGRAM FILES\GALILEO FLIGHT INTEGRATOR"  
START GALILEOFLIGHTINTEGRATOR.EXE
```

When a user wishes to launch Focalpoint and Galileo Flight Integrator™, use the Batch File and both applications should start.
